

# MARVOW 2.0

Coordinated Multi-Agency Response  
to Violence against Older Women

## WHY MARVOW 2.0?

Violence against older women is a gender-specific, and major social problem in every European country, requiring an intersectional approach and coordinated multi-agency response. The MARVOW project showed gaps in the system designed to tackle domestic abuse against older women.

## OUR WORK

MARVOW 2.0 will establish large-scale transnational action with the aim to provide services with improved knowledge and tools, to effectively address gender-based violence against older women in 7 European countries and create recommendations and guidance on the EU level.
